

**International Journal of Energy Technology and Policy**

**SD2024: Special Issue on: "Advancing Sustainable Development: Banking Strategies, Energy Transition, and Green Economies"**

*Guest Editors:*

Assoc. Prof. Rui Alexandre Castanho, WSB University, Poland; Valoriza-IPP, Portugal  
Prof. Sema Yilmaz and Prof. Fazil Kayıkçı, Yildiz Technical University, Turkey

The special issue delves into the critical intersection of banking strategies, energy transition, and green economies to propel sustainable development. Contextually, by investigating the roles of financial institutions in supporting renewable energy initiatives, analysing the economic implications of energy transitions, and highlighting successful green economy models, this issue provides valuable insights for researchers, policymakers, and practitioners. Thus, it aims to facilitate a deeper understanding of how innovative banking strategies and concerted efforts toward energy transition and green investment can drive sustainable development agendas worldwide, catering to a diverse readership interested in finance, energy, economics, and environmental studies.

The Guest Editors will be inviting substantially extended versions of selected papers presented at the [VI International Congress on Sustainable Development: Banking, Energy Transition, and Green Economies \(SD2024\)](#), for review and potential publication, but are also inviting other experts to submit articles for this call.

## **Subject Coverage**
